Before you begin 1

Before you begin

You can quickly prepare to get started using the Astra REST API by reviewing the steps described below.

Review REST concepts and implementation

Make sure to review [Core REST implementation](#) for information about REST concepts and the details regarding how the Astra REST API is designed.

Have Astra account credentials

You'll need Astra credentials to sign in to the Astra web user interface and generate an API token. With Astra Control Center, you manage these credentials locally. With Astra Control Service the account credentials are maintained by the **Auth0** service.

Get more information

You should be aware of the additional information resources as suggested in [Additional resources](#).
