# Hello world

You can issue a simple Curl command at your workstation's CLI to get started using the Astra REST API and confirm its availability.

## Before you begin

The Curl utility must be available on your local workstation. You must also have an API token and the associated account identifier. See [Get an API token](#) for more information.

## Curl example

The following Curl command retrieves a list of Astra users. Provide the appropriate <ACCOUNT\_ID> and <API\_TOKEN> as indicated.

```
curl --location --request GET
'https://astra.netapp.io/accounts/<ACCOUNT_ID>/core/v1/users' --header
'Content-Type: application/json' --header 'Authorization: Bearer
<API_TOKEN>'
```
